

Maine H1N1 Influenza (“Swine Flu”) Update

Data Summary for Tuesday, July 7, 2009, 5 PM

Flu info on the Internet: <http://www.maine.gov/dhhs/boh/swine-flu-2009.shtml>

12 new cases reported

****Next update will be Friday July 10, 2009****

Maine CDC has transitioned from daily to bi-weekly postings of the H1N1 Update. Because H1N1 is now widespread in the state, tests are being conducted less frequently and case counts are less meaningful than they once were. The Update will continue to include case counts and demographic data, along with a summary of activities related to H1N1 prevention and control

Summary Information:

- 12 new cases were reported since the last update. 1 case was tested in Androscoggin county, 3 in Cumberland county, 4 in Kennebec county, 1 in Lincoln county, 2 in Somerset county and 1 in York county.
- A total of 7 patients have been hospitalized with H1N1 to date, all have been discharged.
- Although case counts are reported here, it is important to note that individual case data are useful only in that they are markers of the presence of H1N1 in a given county or geographical area. Many people with H1N1 are not tested, and their illness is not reflected in the case counts. Counties or regions with no reported cases may still be affected.

Current Case counts:

Case Counts	Confirmed	Probable
Maine	93	1
Out of State	47	0

- A total of 94 Maine residents have been diagnosed with H1N1 (93 confirmed, 1 probable). In addition, 47 out of state residents were diagnosed while visiting Maine, for a total of 141 diagnoses in the state.

Lab Testing:

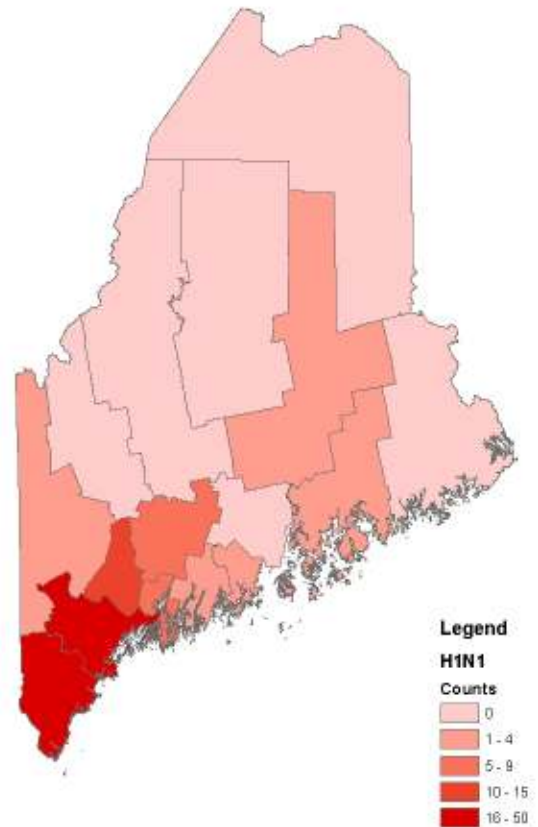

HETL numbers	# tests
